Company Background

Ayvens Insurance is part of the Ayvens groups, a leading provider in mobility services worldwide with 3.3 million vehicles under management worldwide. Euro Insurances DAC (trading as Ayvens Insurance) offers fleet insurance solutions to Ayvens operating entities worldwide.

The Ayvens brand was launched in 2023, following the merger of ALD and LeasePlan leasing groups to create a market leader in mobility. Ayvens Insurance incorporates legacy insurance books from the ALD and LeasePlan groups.

Ayvens Insurance is part of the Societe Generale Group.

Job Purpose

The Developer role is part of the Applications and Data Management department and will be involved in assisting with both maintaining and creating bespoke solutions on SQL Server and MS Dynamics.

This role is offered to assist in ongoing initiatives, including the maintenance of existing solutions that support budgeting and planning and other solutions that facilitate 'One Source of the Truth' reporting within the company.

This role reports directly to the Applications and Data Manager.

Responsibilities will include but are not limited to:

- Work with members of the Applications and Data Management (ADM) Department to translate business requirements into technical deliverables.
- Analyse, build and implement effective and efficient processing and reporting solutions for use throughout the company
- Assist in the maintenance in existing AYINS applications, developed in SQL Server/MS Dynamics
- Creating and maintaining ETL processes utilising SQL Server Integration Services (SSIS).
- Creating and maintaining reports utilising SQL Server Reporting Services (SSRS).
- Providing technical support to the various internal departments on all team software
- Produce quality documentation relevant to all changes delivered

Knowledge & Skills

- The ideal candidate will combine deep functional and technical knowledge of the Microsoft technologies (T-SQL, DWH, ETL, Power BI, SSIS, SSRS, SSAS)
- MS Dynamics with excellent customer engagement skills.
- Some experience in the following technologies would be advantageous but not essential.
  - SAS PROC SQL, PostgreSQL or PL/SQL

- Site Deployment
- Microsoft SharePoint
- Unit Testing Frameworks

- Candidates with active Microsoft certifications will be looked upon favourably.

Candidates are expected to have experience in the following non-technical areas:

- Customer requirements gathering
- Systems analysis and design
- Good understanding of core project management principles and the overall software development lifecycle
- Excellent communication skills, both verbal and written
- The ability to work both autonomously and remotely
- Excellent presentation and proposal writing skills

AYVENS Insurance is an equal opportunities employer.
